

SEPTEMBER 16 - OZONE DAY

Our NSS Unit had decided to conduct programs on the ozone day. The ozone layer is a thin part of the Earth's atmosphere that absorbs almost all of the sun's harmful ultraviolet light. "Ozone holes" are popular names for areas of damage to the ozone. September 16 was designated by the United Nations General Assembly as the International Day for the Preservation of the Ozone Layer. This designation had been made on December 19, 2000, in commemoration of the date, in 1987, on which nations signed the Montreal Protocol on Substances that Deplete the Ozone Layer.

In the morning we have conducted a google meet with all the volunteers sharing the importance of the ozone day. ASHWATHY PUSHPARAJAN took a speech about the importance of the ozone day. And we also conducted an essay competition from. 10. am to 12.pm. The winner is ASHWATHY D CHANDRAN from 2nd BSc chemistry.
